siyam1990@gmail.com

Frontend Developer with a strong ability to learn and adapt to diverse work environments. Passionate about problem-solving and tackling challenges, which has driven my commitment to growth and development in this field.

Projects

Frontend Developer | Ezzix - Interactive 3D Jewelry Customizer Platform

Project: Spearheaded the end-to-end development of ezzix.com, a sophisticated web application for real-time 3D jewelry customization and visualization.

Technical Contribution: Architected and built the entire Next.js frontend application.

Engineered the core interactive 3D experience using Three.js, implementing features for dynamic material switching, color manipulation, and lighting adjustments on complex 3D models.

Developed the full backend API and server-side logic using Next.js API Routes, handling model data, user customization states, and image export functionality.

Created a seamless user flow from 3D customization to final high-quality image export.

Frontend Developer | Bazzin - AR Entertainment Portal

Project: Full-stack development of bazzin.ir, an entertainment website featuring an interactive Augmented Reality (AR) module.

Technical Contribution: Led the complete frontend and backend development using Next.js.

Using web-based AR libraries to deliver an immersive in-browser AR experience.

Frontend Developer | Paw Pal - Community Donation Platform

Project: Developed the frontend for pawpalme.com, a platform connecting dog owners for emergency blood donations.

Technical Contribution:

Independently translated UI/UX designs into a fully functional, responsive Next.js application.

Built reusable components for testimonials, newsletter signup, and service descriptions to foster community engagement.

Frontend Developer (Contributor) | Almubdieun Tech Corporate Website

Project: Enhanced the corporate website (almubdieuntech.com) for a digital solutions agency.

Technical Contribution: Developed new page sections and updated content using Next.js to showcase the company's expertise in AI development, 3D environments, and custom software solutions.

Work Experience

2024-2025 / Frontend Developer in AlmubdieunTech.
